

HELMHOLTZ VIRTUAL INSTITUTE
DYNAMIC PATHWAYS IN MULTIDIMENSIONAL LANDSCAPES

Young Investigators Workshop

22 – 27 April 2018, Grainau/Eibsee-Hotel

ACADEMIC DIRECTOR
Prof. Dr. Alexander Föhlisch

LOCATION

Eibsee-Hotel, Bavarian Alps near Grainau. The Eibsee-Hotel has direct access to ski and hiking areas.

APPLICATION

Please apply until Feb. 20th, 2018 via email by sending a short CV and an abstract (250 words) to grunewald@helmholtz-berlin.de. The number of places is limited!

Application deadline
Feb. 20th, 2018

SCOPE

The Virtual Institute (VI) Dynamic Pathways in Multidimensional Landscapes explores the governing principles of material functions in an internationally highly visible center of excellence. Young scientists are invited to participate in the Young Investigators Workshop 2018. It focuses on the research topics of the Helmholtz Virtual Institute 419 and includes both experimental and theoretical projects on molecular and chemical dynamics, phase transition, and switching as well as fundamental light-matter interaction.

We strongly encourage young scientists (PhD students, Master students, and Postdocs) who work in this field to apply for this 1-week workshop, and to present and discuss their results in an informal atmosphere. For eligible young researchers this Virtual Institute covers costs for the workshop fee, accommodation, and board.

WORKSHOP PROGRAM

- **Sunday 22nd April:** arrival, dinner/get together, evening talk.
- **Monday–Thursday:** morning session, outdoor workshop, afternoon/evening session.
- **Friday 27th April:** departure.

Each participant is asked to give a presentation (duration 15 + 5 minutes discussion).
